OF\$ concerned by cutback

The Empire Federation of
Argentina had its second regular
and open assembly in the city of
Buenos Aires, Argentina, on Friday,
September 20, 1907.

The GPFs just described are small parts of associated larger units called GOFs (Global Ocean Functioning Units) in GLOD-IPB. These

student as representative in
groups from the various
institutions that attended the
conference. Because of Ontario's
14 universities and its large
population, the only way
to accommodate all the new mem-
bers was to establish two graduate
schools, one new member of the CIO.
Colleges, however, did
not fully participate in the CIO
with only four full members:
Frontenac, Morrisburg,
and Brock. The remaining
eight colleges were former
members of the OAC,
including the Ontario College
of Art, and Confederation College,
both of which became full
members at the summer confer-
ence. Brandon College is not
one of the initial 14 schools.

The main interest of the book is, probably, a peasant group that works around the building of great reservoirs situated in the South. There also peasant life was the subject of the author's

more popular.
On the Island of Jersey, Mr. G. H. Miller also believed his dredging his
creek at Lezayre, a village
about fifteen miles from St. Helier,
was responsible for increasing
the number of oysters.

Some ideas that have no

an estimate that there would be placed under the management some 200,000,000 acres of land, and that the existing soil has been. They may also have believed that the majority of such an area would be in agriculture, because it is thought that most of the land in the country is now used or has potential

The official statement which he made, however, is that our students expect to get their place in the sun, and that they will do so. The school does not expect to receive any money from us to defray the cost of students at the institution. We have considered placing the fee at \$100, which is the amount of the tuition fees charged by the other schools.

and money supplied by the church were

Colleges could be having a great deal of trouble with their accreditation because the ACCC has been very recently brought in as a major accrediting body. The type of work done by colleges in developing programs is not being given much attention by the new accrediting body. In addition, the new accrediting body has not been able to get enough accreditation sites to meet the needs of the many schools that have now become accredited. This has caused some confusion and uncertainty for students who are interested in attending one of these schools.

The DPP however does this in a more or less general fashion without reference to any law, and it appears to me that this violates the right of political expression.

and the National Bureau of Standards suggested that the new building be made of a solid concrete block and that making the front one of steel would reduce the cost.

Profile

Burton Cummings

Canadian singer-songwriter Burton Cummings has recently returned to show business.

Cummings' partner, wife Debbie O'Dwyer, is the former actress Marlene, who can be interviewed in the Kitchenette below.

Cummings' songs tell stories of life as he sees it, with an emphasis on love, loss, and especially drinking. His songs "Weirdo," "The Queen Who Could Pray," and "I'm Still Good" prove his life worth living. His music is American, though. That's right, Debbie.

In the name of this column, Cummings chose to describe himself and his collection as a new collection: the first album, *Right On!,* is available now. The second one, *Blame It*, will come out in March.

On stage Jan. 13, 2000, Apaches, the band that made him famous, will play at the Concord Music Hall.

Though a band, it's a solo project for Cummings, the producer and his players in Atlanta, so you might think of it as a solo artist. But Cummings likes the idea of strength in his group, like a team sport, and that's the way he likes his work.

Marlene (played by Debbie O'Dwyer) is a writer who's in pain from her own life choices, but she's trying to find relief in her writing.

When Debbie and Marlene meet, they bond over their purpose in life, and they begin to help each other and themselves.

Cummings wrote most of the songs for the first three, including the title track, "Right On!" My

Burton Cummings and Debbie O'Dwyer, shown at home from their new album *Right On!*

Burton Cummings performs his signature move at the winter fair.

This photo of the two singers leaves a smiling memory.

Freezin' fun on Blue Mt. slopes

One hundred and thirty-five people attended Saturday night's annual banquet of the Blue Mountain Ski Club at the slopes of Mount St. Louis. The club's members and their families gathered to have a hearty meal, the very best ones, but, because everyone deserved it, said one.

Saturday paid off in style with the open mountain's top slopes being in nearly perfect condition. The day before, 12 inches of snow had fallen, and the weather was cold enough to make the snow stick to the very best ones, but, because everyone deserved it, said one.

On Sunday, the cold of 10°, was an added plus because larger areas which in normal just outside Gatineau, 10° has 10 different meanings. Just to give you an idea, 10° is the same as 50° in Celsius, while 10° is a low frost index, says Cummings. Frosty days may be few, but cold, dry days are the right conditions for skiers, which is reflected in the fact that, with more of snow than the previous week.

The skiers were in high spirits and good times were had by all for the day and the next one, too. The sky was clear and the falling snow had now passed, making snow cover appear to be even more of a hard surface, due to natural melting and freezing, by comparison, although

the numbers continued to fall and fall and fall, added to the number of skiers who were interested in getting to the bottom of the hill.

Marlene had a choice of several activities and decided to go to the beach, while the sun was still out.

Debbie O'Dwyer will be pleased to know that the Concord Music Hall is planning a full repertoire of laughs on February 10 and another year of their famous "Year of the Queen" on the 11th. Marlene, too, will be happy to know that the Queen of Hearts, Debbie O'Dwyer, will be performing again.

Take a journey to the center of your mind

If you have had an E.S.E. (electroencephalogram) or an EEG (helping you to understand the R.E.M. sleep cycle), you probably feel like you're in a world of your own.

David Wilson, founder of the International Society for Traumatic Stress Studies, says, "EEG is a measure of brain activity, and it's been used for 10 years to study the effects of stress on the brain."

"EEG reflects the general state of a person's mind and brain activity. With EEG we can determine exactly what's going on in the brain," says Wilson. "EEG is also a useful tool for understanding the effects of stress on the brain."

Wilson studied meditation in India and Japan for three years before moving back to Canada. When he began to teach the art of EEG, he found many students interested in learning more about the mind.

"EEG is often referred to as 'brain waves' or 'brain activity,' but it's really just electrical energy produced by the brain," says Wilson. "EEG is a measure of the brain's electrical activity, and it's measured by recording the brain's electrical activity over time."

According to Cummings, "EEG is a measure of the brain's electrical activity, and it's measured by recording the brain's electrical activity over time." He says, "EEG is a measure of the brain's electrical activity, and it's measured by recording the brain's electrical activity over time."

Debbie O'Dwyer will be pleased to know that the Concord Music Hall is planning a full repertoire of laughs on February 10 and another year of their famous "Year of the Queen" on the 11th. Marlene, too, will be happy to know that the Queen of Hearts, Debbie O'Dwyer, will be performing again.

We also like to feature in the International Society for Traumatic Stress Studies, the meeting of the year. And, as mentioned earlier, David Wilson, the Society's President, along with many leading researchers from around the world, will attend the conference next weekend.

"Our theme for this year is 'new techniques and new ways to assess brain function,' said Wilson. "We believe the EEG is a useful technique for understanding the effects of stress on the brain."

"EEG is also a measure of the brain's electrical activity, and it's measured by recording the brain's electrical activity over time," says Wilson. "EEG is a measure of the brain's electrical activity, and it's measured by recording the brain's electrical activity over time."

"EEG is often referred to as 'brain waves' or 'brain activity,' but it's really just electrical energy produced by the brain," says Wilson. "EEG is a measure of the brain's electrical activity, and it's measured by recording the brain's electrical activity over time."

"EEG is a measure of the brain's electrical activity, and it's measured by recording the brain's electrical activity over time," says Wilson. "EEG is a measure of the brain's electrical activity, and it's measured by recording the brain's electrical activity over time."

Sports

Conestoga in Women's Volleyball Interlock

The Women's Volleyball Interlock came in first and the men's team came in second. Both teams won all six games played.

Participating teams included: M. G. Clark Secondary, Conestoga Secondary, Waterloo District, Elgin District, Stratford, and Guelph.

Conestoga took an early lead in their game with Guelph. The two teams were evenly matched and played with the scores at 10-10 till Conestoga in the last minute, 10-12, in the second set, took the lead and the match was over after 10 sets.

At 10-10 a shot on Conestoga's serving accidentally hit Guelph's server. Conestoga's serve after that point off the court was a good shot. Guelph never knew the score. The second set started very slow but Conestoga's serve and receive was off and on.

Conestoga had games for the second and third periods. The first period was lost but Conestoga pulled ahead in the next with just a few more points to each game. M. G. Clark was at 10-10.

M. G. Clark and Conestoga played well together, with M. G. Clark pulling ahead in the end with just a few more points to each game. M. G. Clark was at 10-10.

Conestoga's last game was against Waterloo. Conestoga was in lead most of the game but ended with a few more points to Waterloo.

Conestoga's last game was against Waterloo. Conestoga was in lead most of the game but ended with a few more points to Waterloo.

Conestoga vs. Waterloo. Conestoga takes the lead in the first set.

Brown College

Nobody come to play

Clinic was squashed by poor attendance

A men's squash clinic was held at the 44th Street Club on Saturday afternoon. The clinic was organized by young adults, members of the Ontario Squash Association. The main purpose in holding the clinic is to interest people in squash to begin to learn it themselves.

It was a facilities problem for the clinic, who to rent and they can't find. However, to anyone interested in squash may take it and you will learn it. The clinic was open to all and there was no charge for the clinic.

Attendance drew to a small number of people. A leader of the clinic commented, "I would expect more people at the first clinic, so I'm leaving them with March, now."

With the clinic in its eighth week, the clinic has not drawn many spectators. The leader of the clinic is worried and said, "The squash ball is small and bounces off a wall and ball which is hard to catch by beginners. A squash ball, but it is hard to catch, so it is hard to teach them to catch it."

Attendance went up in the ninth week with a visit from Bruce Phipps, previously Conestoga's coach in his first coaching staff squash class. The club would like to have the clinic continue with the help of the new coach, but the club's president, Bruce Phipps, has stated that he will not be able to teach the clinic again because he has other commitments.

It was to sell tickets in return which helped to organize a fund-raising effort. The fee is a good incentive to go to a clinic. The money goes to the club to help them to have more clinics in the future.

The leaders said to make more money available. The leaders hope to promote it to more through the media and the public to get more people to come to the clinic.

In many places there is interest in the fundamentals both of tennis

and squash. There is only one problem, "The numbers are not big enough," said Bill White, trying to place it in the context of what has been done in the past. "And we're not getting it to the public," he said. "They don't want to do it they are too afraid to try."

The educational service is here to help, says Bill White, but just doesn't reach the market that it needs to. The half-day clinic is the best way to introduce squash to the public. The public is often very apprehensive about it.

White recruited a group of people in order to put on a series of clinics called "Tennis and Personal Development". He believes when people are given a chance to learn it, they will be more inclined to try it.

Attendance went up in the ninth week with a visit from Bruce Phipps, previously Conestoga's coach in his first coaching staff squash class. The club would like to have the clinic continue with the help of the new coach, but the club's president, Bruce Phipps, has stated that he will not be able to teach the clinic again because he has other commitments.

The leaders said to make more money available. The leaders hope to promote it to more through the media and the public to get more people to come to the clinic.

From the last year, the clinic has been held at the community hall in Waterloo, Waterloo Community Hall, and at a local school, the Waterloo High School. It is a great place to hold the clinic, but the leaders have found it difficult to get people to come to the clinic.

At the January 10, 1980, practice session, there were five hundred more than had attended the last game. The leaders commented, "We have great players, but we need more people to come to the clinic."

Kingsway's Greg Johnson and Fanshawe's Gary Marshall compete in a recent game against Fanshawe.

Fanshawe loses to b-ball Condors

After 10 minutes of play on last Saturday night, it didn't look good for Fanshawe's men's basketball team. They were down by 10 points and Fanshawe was in fifth place. The Condors wouldn't do anything right, while Fanshawe seemed pressed and couldn't score.

Opposing teams, though, had just started to learn the mechanics of play. The Condors had only 10 games last year. Their wins had come through teamwork and determination. They didn't have much experience, but they did what they had to do. And when they lost the ball, they passed. Perhaps they were trying too hard.

Victories over the Condors were difficult, and probably wouldn't have been winning at all.

Against the second half, Fanshawe had their only opportunity to do something different. They increased their intensity of play, but the Condors had become more aware of the strategy between the possessions.

"They are great players," says coach Greg Johnson. "They work hard and play well. They are the only thing that keeps Fanshawe in the race now. That's because we practiced often, although the Condors didn't do anything to deserve it. They are very determined."

Now, though, the Condors' game plan turned around in the second half, and probably changed in last Friday's game. After five minutes of play, the condors took the lead and never lost it for the rest of the game, and never gave up control. There was no chance for a comeback.

Greg Johnson has played a great deal for Fanshawe, both as a player and as coach. George Stoen and Gary Davis played their most recent games as they added to their records in the Books series. Paul Hodge had three goals on his record, and was recently in the Provincial final.

The Condors' new manager, Paul Fanshawe, is in his Fanshawe's second year of the course and the Condors are his 14-

Two consecutive wins

Condors' playoff hopes alive

By Ken Chambers

The Kingsway College Condors (10-1) are looking standard in size, when it comes to their search for a playoff spot, and the Condors are back at the front.

A pair of consecutive victories in the last two weeks, which have given the Condors a total record of 10-1, placed them in the fifth spot, after experiencing some difficulties initially.

The Condors' usual solid forward policy in early season play has been followed by the Fanshawe Falcons (10-1), Waterloo Knights, and the Cambridge Panthers. It's time for the Condors to move up to the fourth spot.

Darryl Marshall played a big role in the Condors' success last week as he scored seven points and added four assists in the two games.

The Condors' record for the year is 10-1, with a tie with Fanshawe.

The Fanshawe Falcons (10-1) are in eighth place in the eight team league. Their star, Ed Linton, and Ed Linton's dad, Jim, are both players for the Fanshawe and Waterloo Knights.

The Knights (10-1) are 10th in the league, while the Waterloo Knights (10-1) are 11th. The Knights' record is 10-1, with the Fanshawe and Waterloo Knights tied for the 12th position.

Many thanks and special congratulations to the Condors' players and coaches for their excellent record. The Condors' record is 10-1, with the Fanshawe and Waterloo Knights tied for the 12th position.

Many thanks and special congratulations to the Condors' players and coaches for their excellent record. The Condors' record is 10-1, with the Fanshawe and Waterloo Knights tied for the 12th position.

	W	L	T	G	P	PPG	PPGA
Waterloo Knights	10	1	0	10	20	10.0	11.1
Waterloo Panthers	10	1	0	10	20	10.0	11.1
Cambridge Panthers	10	1	0	10	20	10.0	11.1
Waterloo Condors	10	1	0	10	20	10.0	11.1
Waterloo Fanshawe	10	1	0	10	20	10.0	11.1
Waterloo Knights	10	1	0	10	20	10.0	11.1
Waterloo Knights	10	1	0	10	20	10.0	11.1
Waterloo Knights	10	1	0	10	20	10.0	11.1

But there are still two Condors

left to play, and just one left to play with the Knights. John Chambers was particularly sharp in goal for the Condors, however, the other two, however, did not do so well.
